Team player
Fast learner
Motivated
Honest
Hope
Perspective
Humor

DİLLER

Turkish: Native Language
English : B2

ABOUT

I started learning web development a year ago. From then i made so many designs real using html, css and javascript. I just love putting every element of the page together like decorating a balcony.

PROJECTS

Study Timer | Project Link - Github Link

   I developed a platform that you can set a timer play an ambient sound in the back so you can relax while studying or working.
   I used html, css, javascript, react and tailwindCSS for this project.

Track Your Progress | Project Link - Github Link

   I developed a progress tracker app. I used nodejs, express and mongoose in the backend to create a RESTFul API. I used React.js and tailwindCSS in the frontend. I also used d3.js for showing off some data. In this project you can enter a exercise to the database and in this exercise's page you can update your max performance and see your progress.

EDUCATION

SOFTWARE ENGINEER
Fırat Üniversitesi | 2017 - 2022 (still studying) - GPA (3.59)

   I learned algorithmic thinking and solved many problems using Java and C#. I also learned and used agile and scrum methodologies in my school projects.

WORK EXPERIENCE

FRONTEND DEVELOPER INTERN
Grafiket Adworks | Oct 2020 - Dec 2020

   Worked with designers and I made their designs alive using html and css. Also worked with a back-end developer. I learned to turn design files to working web pages.
